Jordan Lee

Seattle, WA | (206) 555-0147 | jordan.lee.cs@example.com | linkedin.com/in/jordanlee-cs | github.com/jordanlee-cs

EDUCATION

University of Washington, Seattle, WA Expected Graduation: June 2027
Bachelor of Science in Computer Science GPA: 3.7/4.0
Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Discrete Mathematics, Database Systems, Computer Systems

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL
Technologies: HTML, CSS, REST APIs, SQLite, Flask
Tools: Git, GitHub, Linux, VS Code, pytest

TECHNICAL PROJECTS

TaskFlow - Task Management Web Application *github.com/jordanlee-cs/taskflow*

- Built a task management application that allows users to create, update, complete, and filter tasks by priority and status.
- Designed a relational database structure for users and tasks, implementing parameterized queries to manage stored data safely.
- Added input validation and basic automated tests for core task operations, then used Git for version control and iterative debugging.

Expense Tracker - Personal Finance Application *github.com/jordanlee-cs/expense-tracker*

- Developed a command-line expense tracker that records transactions, assigns spending categories, and generates monthly summaries.
- Implemented database queries for filtering and aggregating expenses by date, category, and payment type.
- Improved maintainability by separating user input, database operations, and reporting logic into distinct modules.

Campus Data Analysis - Student Performance Analysis *github.com/jordanlee-cs/campus-data-analysis*

- Analyzed a publicly available education dataset to examine relationships among attendance, study time, and academic outcomes.
- Cleaned missing and inconsistent records using pandas and created visualizations to communicate key trends.
- Documented assumptions, analysis steps, and limitations so results could be reproduced and evaluated clearly.

LEADERSHIP & ACTIVITIES

Computer Science Club, University of Washington Member | September 2024-Present

- Participated in programming workshops, technical discussions, and collaborative coding activities.
- Practiced explaining programming concepts and debugging approaches through peer collaboration.

Husky Coding Outreach Volunteer Mentor | January 2025-Present

- Led weekly introductory programming sessions for local high school students using Python exercises and guided debugging.
